PROFILE

AI-native Product Design Engineer who turns ambiguous ideas into interactive working prototypes using AI-assisted workflows. Experienced in building and shipping 0→1 product concepts by combining UX systems thinking with lightweight frontend implementation (React, TypeScript). Uses tools like Cursor and ChatGPT as core collaborators for rapid prototyping, iteration, and feature validation.

SKILLS

React & TypeScript (production implementation)	Design-to-Code Translation (Figma → Production)
Component Architecture & Reusable UI Systems	Performance & Frontend Optimisation
API Integration & Real-Time Data	AI-Assisted Development Workflows (Cursor)
UX Systems Thinking	UX Research & Usability Testing
Accessibility & Semantic UI	

SELECTED PROJECTS

Mar 2025 — Dec 2025

RedVelvetVault

Designed and shipped a 0→1 interactive web platform enabling users to explore and engage with digital art inside immersive 3D gallery environments. Transformed an abstract experiential concept into a functional, testable product through rapid AI-assisted prototyping and iterative refinement.

Role: Product Design Engineer (0→1 Build)

- Led concept → prototype → working demo lifecycle, translating ambiguous experiential ideas into usable interaction flows and live product features.
- Used AI-assisted workflows (ChatGPT + Cursor) as core collaborators for architecture planning, feature scaffolding, debugging, and rapid iteration—significantly accelerating development cycles.
- Designed and implemented core user journeys including onboarding, navigation loops, authentication, and real-time interaction systems.
- Built interactive prototypes directly in React and TypeScript, validating UX decisions through functional demos rather than static mockups.
- Structured modular UI systems and reusable components to support fast experimentation without breaking product stability.
- Integrated Firebase (Auth, Firestore, Storage) to enable real-time updates, user personalisation, and scalable backend logic.
- Iterated based on usability clarity and interaction feedback, prioritising “aha moments” and flow coherence over visual polish.
- Balanced UX intent, technical constraints (WebGL performance), and product scalability to ship a production-ready experience.

PROFESSIONAL EXPERIENCE

Oct 2024 — Present

INDEPENDENT PRODUCT DESIGNER (FREELANCE)

- Designed and implemented frontend interfaces for client projects, translating product requirements into responsive React-based components.
- Collaborated with stakeholders to define feature scope and iterate rapidly in short development cycles.
- Applied design systems and accessibility standards to ensure production-ready delivery.

PRODUCT DESIGN CONSULTANT (Content & Growth), TWO
BLOKES TRADING

Dublin

Two Blokes Trading is a finance-focused content brand with a growing digital product offering (Trevesto), targeting retail investors.

- Contributed to product growth and user engagement through end-to-end content design for Two Blokes Trading's app and brand ecosystem (including Trevesto)
- Produced 30+ long-form podcast episodes and 250+ short-form videos across YouTube, Instagram, TikTok, LinkedIn, X, and web platforms.
- Designed and delivered 300+ digital assets aligned with brand positioning, SEO strategy, and platform-specific user behaviours.
- Increased YouTube subscribers from 2.9K to 8.2K (+183%) and total views from 34.9K to 165.5K (+374%) within 10 months while working two days per week.
- Collaborated with marketing to create SEO-driven, user-focused multimedia content, improving engagement through clear CTAs and accessible cross-platform design.
- Worked closely with founders, marketers, and developers, incorporating feedback rapidly and contributing design input during app development to align content with overall product strategy.

Jul 2022 — Mar 2023

ARCHITECTURAL INTERN, ARCOP ASSOCIATES

Bengaluru

Arcop Associates Pvt Ltd is a multidisciplinary architecture and design firm known for large-scale commercial, institutional, and urban development projects across India.

- Produced detailed technical drawings (plumbing, HVAC, lighting) aligned with design specifications and regulatory standards, ensuring clarity between design intent and execution.
- Led 3D visualisations and high-fidelity presentation decks for 5+ major projects, improving stakeholder understanding and decision-making (reported 60% increase in client clarity).
- Collaborated with multidisciplinary teams to translate technical constraints into clear, visually communicative design solutions.
- Applied user-centred principles to spatial layouts, incorporating feedback to improve functionality and usability of built environments.
- Contributed to structured documentation systems that improved workflow consistency and design standardisation across projects.

EDUCATION

Sept 2024 — Mar 2026

MSc in Creative Digital Media and UX, Technological University
Dublin

Dublin

Aug 2023 — Mar 2024

Executive PG in UI/UX [CredentialID - IPTIH2403279], Indian
Institute of Technology Roorkee

Roorkee, India

Jul 2018 — Nov 2023

Bachelor of Architecture, Manipal School of Architecture and
Planning

Manipal, India

TECHNICAL STACK

Design Tools

Figma, Sketch, InVision, Adobe Creative Cloud (Photoshop, After Effects, Premiere Pro), Framer

Frontend Development

HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Three.js, GSAP, Motion.dev

Backend & Data

Firebase, PHP & MySQL, REST APIs, JSON, Node.js, Vercel

Immersive Design

Unity + C#, AR/VR Environments, 3D Interaction, Game UI Design

Collaboration & Tools

Git/GitHub, Trello, Miro, Stakeholder Communication, Workshop Facilitation
